**MPO RESOLUTION
POLICY COMMITTEE
ENDORSEMENT OF OCOG 2019-2022
TRANSPORTATION IMPROVEMENT PROGRAM**

WHEREAS, federal regulations for urban transportation planning issued in October 1993, require that the Metropolitan Planning Organization, in cooperation with participants in the planning process, develop and bi-annually update the Transportation Improvement Program (TIP); and

WHEREAS, the Monroe Urban Transportation Study has been designated by the Governor as the Metropolitan Planning Organization of the Monroe urbanized area; and

WHEREAS, the Monroe Urban Transportation Study, in accordance with federal requirements for a Transportation Improvement Program, has developed a four year integrated program of federally-funded highway and transit projects for the Monroe urbanized area; and

WHEREAS, the TIP is consistent with all plans, goals and objectives of the Monroe Urban Transportation Study, and shall be updated at least bi-annually with revision to reflect changes in program emphasis and funding availability; and

WHEREAS, the urban transportation planning regulations require that the TIP be a product of a planning process certified as in conformance with all applicable requirements of law and regulations; and

WHEREAS, the urban transportation planning regulations provide for the certification of the process by the Federal Highway Administration and the Federal Transit Administration; and

WHEREAS, the staff of the Monroe Metropolitan Planning Organization, the Federal Highway Administration and the Federal Transit Administration have reviewed the organization and activities of the planning process and certified them to be in conformance with the requirements of law and regulations; and

WHEREAS, the locally developed and adopted process for private sector participation has been followed in the development of the FY 2019-2022 TIP.

NOW, THEREFORE BE IT RESOLVED, that the Monroe Urban Transportation Study Policy Committee endorses the attached four-year Transportation Improvement Program for the period 2019-2022.

CERTIFICATION

I hereby certify that the above is a true and correct copy of a Resolution adopted by the Monroe Urban Transportation Study Policy Committee at a meeting held on August 27, 2018.

Jamie Mayo, Chairman
Monroe Urban Transportation Study
Policy Committee

ATTEST:

David Creed
Executive Director

Joint Certification of the Metropolitan
Transportation Planning Process

The State of Louisiana and the Ouachita Council of Governments hereby certifies that the transportation planning process is addressing the major issues facing the Monroe urbanized area and is being conducted in accordance with all applicable requirements of:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964 as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST ACT(Pub.L.114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in US DOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the American with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27,37, and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101, prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities

1. MMPO Committees

The Monroe Metropolitan Planning Organization (MPO) is a consortium of governments responsible, in cooperation with the State, for the transportation planning process for the Monroe Urbanized Area. The MPO is comprised of two committees: the Policy Committee (PC), and the Technical Advisory Committee (TAC). The Policy Committee is the official decision making body, and the TAC advises the Policy Committee on technical matters of projects, plans, and programs.

Policy Committee:

The Policy Committee serves as the official decision making body for the MPO. The Policy Committee oversees how federal transportation dollars are spent in the transportation study area. The Policy Committee's responsibilities include the review and approval of all plans, programs, and projects. It is comprised of elected officials from region within the MPO's study area.

The Policy Committee is composed of six voting members and two non-voting member.

Voting Members:

- Mr. Jamie Mayo, MPO Policy Committee Chairman – City of Monroe, Mayor
- Mr. Stacy Mitchell, MPO Vice Chair – City of West Monroe, Mayor
- Mr. Jack Clampit, Ouachita Parish Police Jury, Member
- Mr. Scott Robinson, Ouachita Parish Police Jury, Member
- Mr. Thom Hamilton, City of West Monroe, Member
- Ms. Juanita Woods, City of Monroe, Council member
- Mr. Marshal Hill – LA Dept. and Transportation & Development, District 05 Administrator

Non-Voting Member:

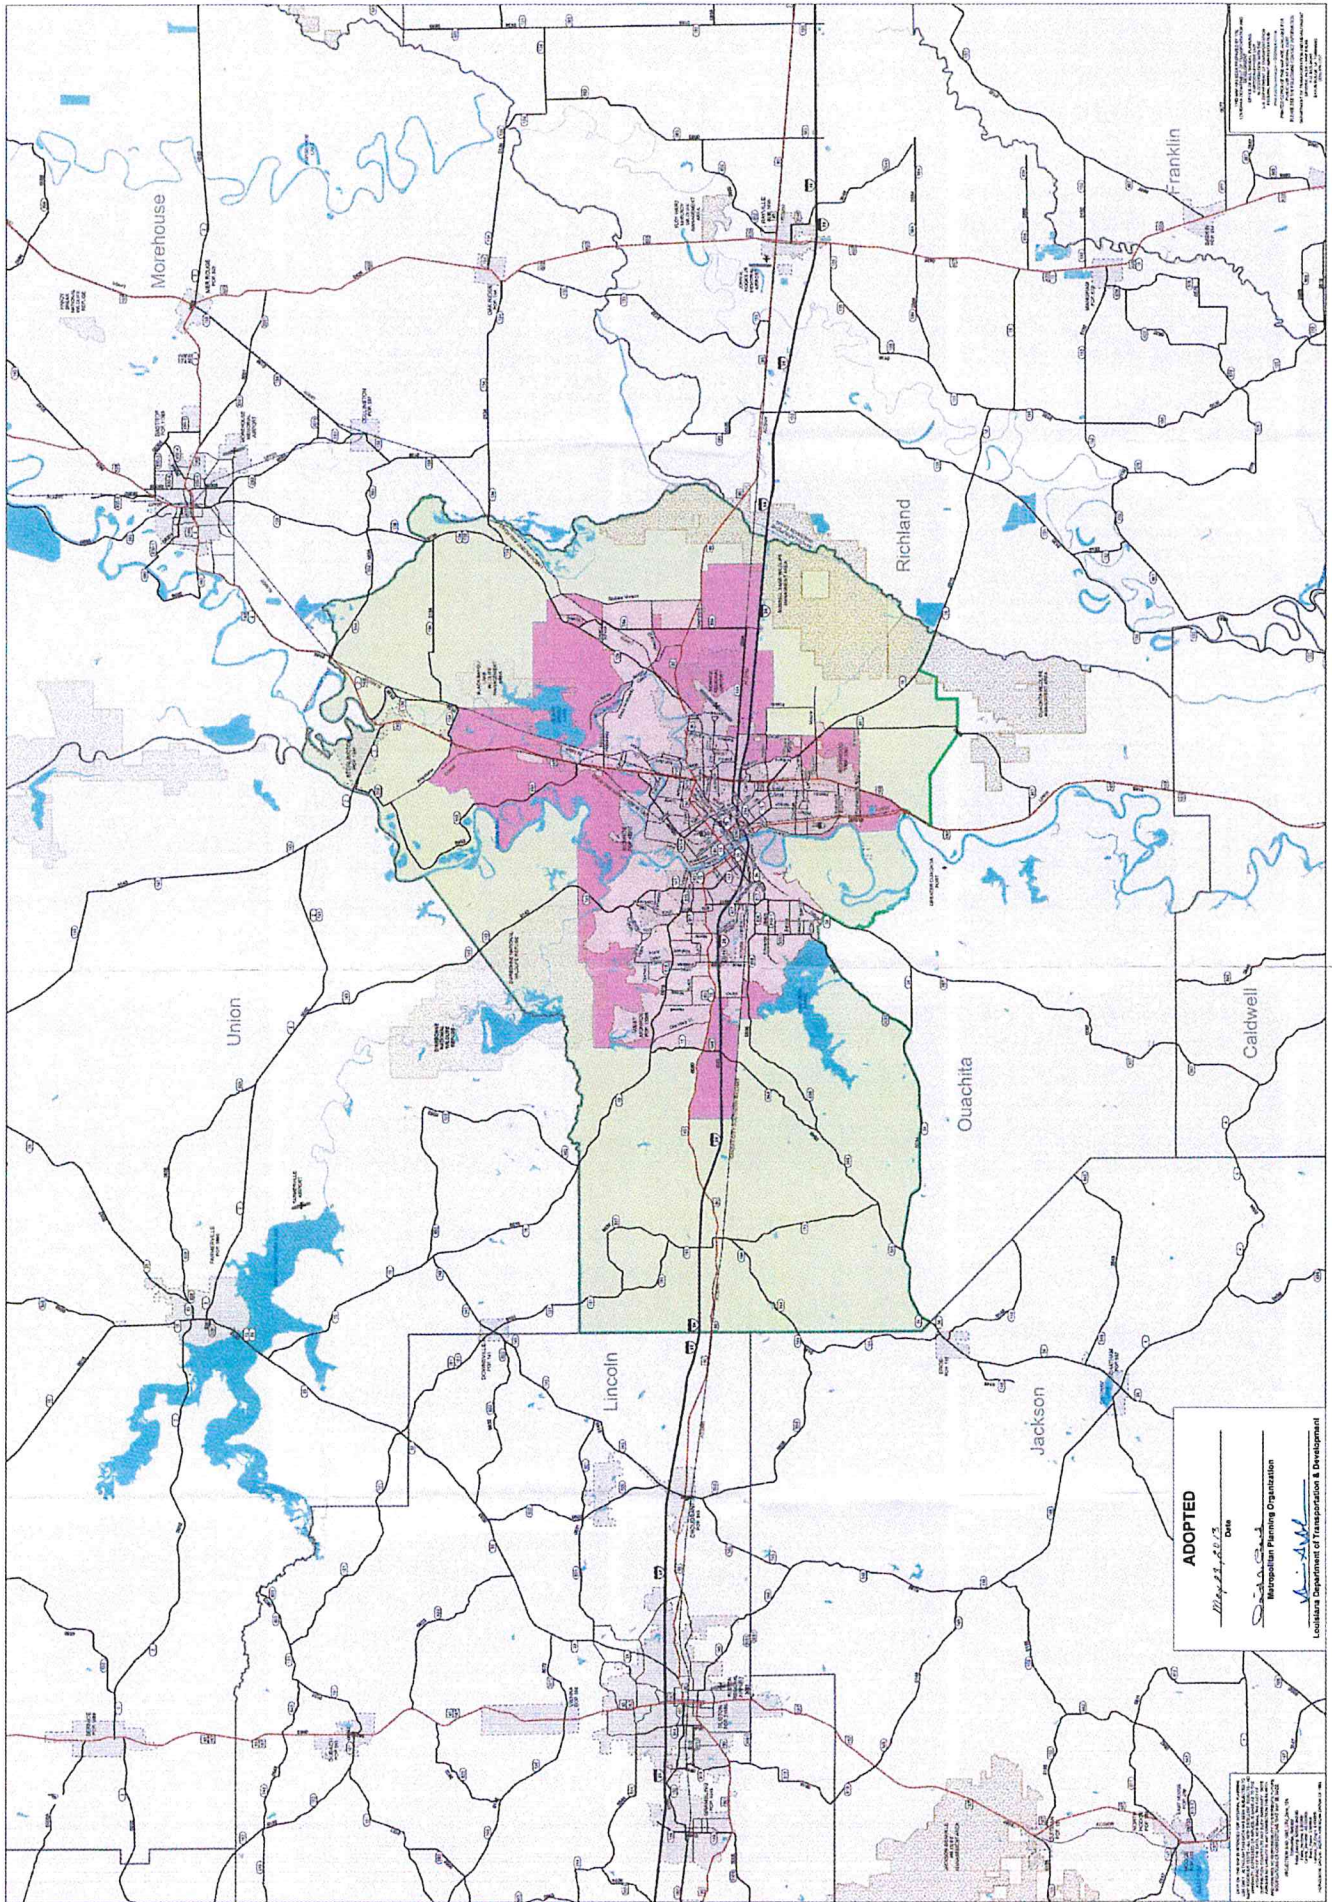

- Mr. Marshal Hill – LA Dept. and Transportation & Development, District 05 Administrator
- Ms. Mary Stringfellow– Federal Highway Administration – Louisiana Division Office

Technical Advisory Committee:

The Technical Advisory Committee reviews plans, programs, projects, studies, and reports and provides the Policy Committee with recommendations concerning them. The TAC is represented by all agencies involved in the transportation planning process. Participants on the TAC include municipalities, parishes, the Louisiana Department of Transportation and Development, the Federal Highway and Transit Administration and other selected transportation interests.

Members:

- Mr. Kevin Crosby, Ouachita Parish Police Jury, Engineer
- Mr. John Tom Murry, Ouachita Parish Police Jury
- Ms. Kim Golden, City of Monroe, Engineer
- Mr. Arthur Holland, City of Monroe
- Mr. Marc Keenan, City of Monroe Transit
- Mr. Robbie George, City of West Monroe, Engineer
- Mr. Bruce Fleming, City of West Monroe
- Mr. Melvin Hicks, LADOTD
- Mr. Dan Broussard, LADOTD
- Ms. Donna Lavigne, LADOTD – Public Transportation Administration
- Mr. Brandon Buckner, Federal Highway Administration

Introduction to Metropolitan Transportation Planning

Metropolitan Planning Organization (MPO)

MPOs, or Metropolitan Planning Organizations, are organizations designated by the federal government to be responsible for long-term urban transportation planning efforts. In other words, eligibility to spend federal money on transportation projects in certain local municipalities depends upon a functioning MPO. MPOs may be formed in areas with a population of at least 50,000 and meeting the minimum population density as defined by the Bureau of Census. They are created by an agreement between the Governor and local governments representing at least 75% of the population in an urban area. Typically, they are a consortium of governments and other bodies, such as transit agencies and citizen groups working together to carry out a cooperative, comprehensive, and continuous metropolitan transportation planning process.

The Transportation Planning Objective

The **Federal-Aid Highway Act of 1962** was the first piece of federal legislation to **mandate urban transportation planning** as a condition for receiving federal funds in metropolitan areas. The act stated:

“It is in the national interest to encourage and promote the development of transportation systems embracing various modes of transportation in a manner which will efficiently maximize mobility of people and goods within and throughout urbanized areas and minimize transportation related fuel consumption and air pollution.”

There are two significant features of the act. First, the act called for a planning process in urban areas rather than cities, setting the scale at the **regional level**. Second, the act called for the planning process to be conducted **cooperatively** with state and local communities.

Products of the Transportation Planning Process

The key role of the MPO is the creation of the **Metropolitan Transportation Plan (MTP)**, a long-range planning document, and the creation of the **Transportation Improvement Program (TIP)**, a project programming document.

The Monroe Metropolitan Transportation Plan (MTP)

The current Monroe Metropolitan Transportation Plan was adopted in November 2015. The purpose of that plan is to develop both long-range and short-range strategies that lead to the development of an integrated, intermodal transportation system. That system, in turn, facilitates the efficient movement of people and goods.

The principle result of the plan is a **prioritized list of improvements** divided into **three stages of implementation**. The first stage of projects forms the basis for the development of the Transportation Improvement Program.

The MTP must be multimodal, maintain a 20-year planning horizon, and be updated every five years. In addition, the plan

must be fiscally constrained, including only those projects for which funding can be expected from reasonable estimated sources.

Factors considered in development of the current MTP are:

- Support Economic Vitality
- Increase Accessibility and Mobility
- Protect the Environment
- Enhance Modal Integration
- Promote Efficient System Management
- Preserve the Existing Transportation System
- Increase Safety
- Increase Transportation Security
- Purpose of the Transportation Improvement Program

The Transportation Improvement Program (TIP)

The Transportation Improvement Program (TIP) is a staged, multiyear program of projects proposed for funding by federal, state, and local sources within the Monroe Metropolitan Area. The TIP was developed by the Monroe Metropolitan Planning Organization in cooperation with Ouachita Parish Police Jury, the City of Monroe, the City of West Monroe and the Louisiana Department of Transportation and Development in accordance with the metropolitan planning requirements set forth in the federal highway spending bill, FAST Act (Fixing America's Surface Transportation Act).

The TIP **identifies roadway and transit projects programmed for construction within the next five years** that implement the goals and objectives identified in the Monroe Metropolitan Area Transportation Plan.

Procedures to Amend or Administratively Modify the Transportation Improvement Programs

The following procedures are applicable for processing amendments or modifications to the TIP. In accordance with the provisions of *23 CFR 450.216(b)*, the Statewide Transportation Improvement Plan (STIP) shall be developed in cooperation with the MPO designated for a metropolitan area. Each TIP shall be included, without change, in the STIP, directly or by reference, after approval of the TIP by the MPO and the Governor.

While every effort has been made to develop this document using the latest information available at the time, it is recognized that there are uncertainties in the development of projects, right-of-way acquisition, relocation of utilities, acquisition of permits, costs, funding availability, etc. Therefore, the Policy Committee has no objection to phases of projects moving within the TIP or STIP as necessitated by the situation, and gives its approval to the MPO staff to make those necessary administrative modifications without action by the Policy Committee. Staff has been directed to keep Policy Committee members informed of upcoming

administrative modifications.

An **Administrative Modification** is a minor revision to a long-range statewide or metropolitan transportation plan, TIP, or STIP that includes minor changes to the project, project phase costs, minor changes to funding sources of previously-included projects, and minor changes to project/project phase initiation dates. An administrative modification is a revision that does not require public review and comment, demonstration of fiscal constraint, or conformity determination (in nonattainment and maintenance areas).

Administrative Modification thresholds include:

- Revisions to a project description without changing the project scope or which do not conflict with the pertinent environmental document;
- Minor changes to the project scope, project phase cost applying to right-of-way acquisitions, utility relocation, engineering, or constructions. These funding changes are limited to \$600,000 for projects less than \$3,000,000 and 20% for projects greater than \$3,000,000;
- Minor changes in funding sources of previously included projects that do not effect fiscal constrain of the STIP or the ability to complete the project as initially described;
- Minor changes to the project scope, project phase initiation dates as long as the project stays within the approved TIP time frame and does not affect fiscal constraint or the ability to complete the project as initially described;
- A change in the project implementing agency;
- A split or a combination of individually listed projects; as long as cost, schedule, and scope remain unchanged;
- The addition or deletion of projects from grouped project (line item) listings as long as the line item total funding amounts stay within the above guidelines.

Each MPO approved administrative modification shall be published online separately from TIP amendments and be forwarded to LA DOTD's Transportation Planning Section and Public Transportation Section for approval on behalf of the Governor. Any instance in which a LA DOTD project affected by an administrative modification that is located within the planning boundaries of the MPO, the MPO must first generate and/or accept the administrative modification in the TIP. Once approved by the MPO, the LA DOTD, on behalf of the Governor, can incorporate the administrative modification into the [STIP. LA DOTD](#) will immediately notify the MPO, FHWA, and FTA of any approved administrative modification(s).

An **Amendment** is a revision to a long-range statewide or metropolitan plan, TIP, or STIP that involves a major change to a project, including the addition or deletion of a project or a major change in project cost, project or project phase initiation dates, or a major change in design concept or design scope. Changes to projects that are included only for informational purposes do not require an amendment. An amendment is a revision that requires public review and comment, demonstration of fiscal constraint, and/or a conformity determination (in nonattainment and maintenance areas).

If a project affected by an amendment is located within the planning boundaries of the MPO, it must first be amended in the TIP before it can be amended in the STIP. Once approved by LA DOTD, on behalf of the Governor, the amendment will be incorporated into the [STIP. LA DOTD](#) will immediately notify the MPO, FHWA, and FTA of any approved amendment(s).

TIP Objectives

The TIP for the Monroe Metropolitan Area was developed with the following local objectives:

- To identify transportation improvement projects as a result of a comprehensive, cooperative, and continuing regional transportation planning process.
- To identify the priorities by the Monroe Metropolitan Planning Organization, local governments and public transportation providers for transportation improvements.
- To use realistic, current estimates of costs for transportation improvement projects, balanced by reasonable estimates of available revenues.
- To demonstrate that energy, air quality, cost and mobility considerations are addressed in regional transportation planning and programming of projects.
- To develop the TIP consistent with the Monroe Metropolitan Area Transportation Plan in accordance with guidelines established in the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users.

TIP Requirements

While federal legislation dictates that the Transportation Improvement Program must cover at least four years. The TIP may be updated annually, but must be updated at least every four years.

The TIP must be financially reasonable or "constrained," with estimates of the total cost for programmed projects balanced against the revenues reasonably expected during the TIP period. The TIP includes both federally and non-federally funded projects. Inclusion of a project in the TIP is a condition for federal funding but does not guarantee it. Non-federally funded projects are included in the TIP for informational purposes in order to provide a more comprehensive picture of how the transportation capital and operating funds are spent in the region.

The TIP must be approved by the MPO and the Governor. Once approved, the TIP becomes, without modification, part of the Statewide Transportation Improvement Program (STIP).

The Programming of Federal-Aid

Unlike most federal programs, highway funding does not depend upon the annual appropriations act for the authority to commit federal funds to a program or project. Such funding is traditionally authorized in a multi-year transportation authorization act, which establishes a maximum level of federal transportation funding per fiscal year. However, the establishment of this level of funding, which is referred to as an authorization, is

only the first step in the process.

Once the authorization level has been established, the United States Department of Transportation annually allocates such funding among states based upon various federal formulas. This allocation is referred to as an apportionment. This amount, or an estimate thereof, is the basis for the development of transportation improvement programs and MPO financial plans. This is not the end of the process, however, because the annual apportionment rarely represents the actual amount of federal funds which can be committed by a state.

Typically, an amount less than the apportionment is actually available, due to the imposition of obligation authority. Obligation authority constitutes a federally imposed limitation on the spending of apportioned funds in a given fiscal year. This limitation may be imposed in a multi-year authorization act, in the annual Appropriations Act, or in both, in which case the most recent enactment controls. Obligation authority is typically less than a state's apportionment; nevertheless, as mentioned earlier, because of scheduling requirements, a state's apportionment is the basis for the development of TIPs.

There are two important distinctions between apportionment and obligation authority. First, apportionment is allocated on a per-program basis, while obligation authority is generally allocated as a lump sum. Also, unused apportionment carries forward into successive fiscal years, but unused obligation authority does not. Unused apportionment that is carried forward is referred to as an unobligated balance. Although a state's unobligated balance can be used to increase the federal-aid programmed within a particular funding category in a given year, it cannot be used to increase the total amount of a state's highway apportionment.

Federal regulations require states to "provide MPO's with estimates of Federal and State funds which the MPOs shall utilize in developing financial plans."

FAST Act Programs

Fixing America's Surface Transportation Act (FAST Act) became law on December 4, 2015 (Public Law 114-94). It authorized highway, transit, and other surface transportation programs for federal fiscal years 2016 through 2020. FAST Act, while not significantly altering total funding, consolidates many of the programs started under the previous authorization acts: SAFETEA-LU, ISTEA, TEA-21, and MAP-21. For the purpose of this document, the core programs are:

The Congestion Mitigation and Air Quality Improvement Program (CMAQ)

CMAQ is a funding source for use in meeting the requirements of the Clean Air Act. Eligible activities include transit improvements, transportation demand management, and conversion of public fleets to cleaner fuels. CMAQ funding is available for use in areas that do not meet the National Ambient Air Quality Standards (nonattainment areas) and in former nonattainment areas that are currently in compliance (maintenance areas). Funds are distributed to states based upon a formula that considers population and severity of pollution. A State may transfer up to 50%

of its increase in CMAQ funds to other federal transportation programs; however, such funds must still be used in nonattainment and maintenance areas.

The Monroe MPO area is currently designated as an attainment area and is not eligible for CMAQ funds.

The Surface Transportation Program (STP)

The Surface Transportation Program (STP) provides flexible funding that may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge and tunnel projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects, including intercity bus terminals.

Highway Safety Improvement Program (HSIP)

Authorizes Federal-aid funding to achieve significant reduction in traffic fatalities and serious injuries on all public roads or publicly owned bicycle and pedestrian pathways or trails. States are required to have a Strategic Highway Safety Plan (SHSP) and certify that it has met its railway-highway crossing and infrastructure safety needs.

Transportation Alternative Program (TAP)

FAST Act establishes a new program to provide for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. The FAST ACT continues the funding from MAP-21 programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and several other discretionary programs, wrapping them into a single funding source.

Public Transportation

Similar to the highway program, FAST Act maintains the nation's commitment to the primary public transportation programs established in previous transportation acts. The principle programs are:

Section 5339 Bus and Bus Facilities

Provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.

Section 5309 Fixed-Guideway Capital Investment Grants

Provides grants for new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors. This program defines a new category of eligible projects, known as core capacity projects, which expand capacity by at least 10% in existing fixed-guideway transit corridors that are already at or above capacity today, or are expected to be at or above capacity within five years. The program also includes provisions for streamlining aspects of the New Starts process to increase efficiency and reduce the time required to meet critical milestones.

Section 5309 Flexible Funding Programs

The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS. This was a new program under MAP-21.

The STP provides funding that may be used by States and localities for a wide range of projects to preserve and improve the conditions and performance of surface transportation, including highway, transit, intercity bus, bicycle and pedestrian projects.

The TAP program consolidates funding from FHWA's former Transportation Enhancements, Recreational Trails, and Safe Routes to School programs.

Section 5310 Enhanced Mobility of Seniors & Individuals with Disabilities

This program is intended to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

FAST Act Planning Requirements

FAST Act preserves most aspects of the previous legislation. However, changes to the MPO planning process are required. These changes must be reflected in the Metropolitan Transportation Plan (MTP) and Transportation Improvement Plan (TIP).

Relevant Documents

Monroe Metropolitan Area Transportation Plan

- LADOTD Project Number: H.97203

The project is a major revision to the master transportation plan for the Monroe Urbanized Area. The study assesses the current state of the area's transportation system, estimates future needs and resources, and provides a detailed program for preserving and expanding the system for a 25-year period.

The project includes a computer model (Travel Demand Model) to simulate traffic conditions for the current transportation system and test potential projects to determine a project's future effect (volume) upon the system.

The travel demand model will incorporate demographic information from the 2010 U.S. Census. The study was adopted by the Monroe MPO Policy committee November 2015. The study was conducted by Alliance Transportation, Inc. of Lake Charles, Louisiana.

Louisiana Statewide Transportation Plan

The Louisiana Department of Transportation completed a major revision to the State's long range master plan for all trans-

portation modes. The study analyzed the State's infrastructure and the document provides a vast amount of statistics to describe the use and condition of the various modes. The plan presents recommended improvements based upon several revenue scenarios. The update began in mid 2000 and a final report was completed December 2003.

Northeast Louisiana Regional Transportation Safety Plan.

Prepared by Cambridge Systematic, Inc. for the Louisiana Department of Transportation and Development. The document will outline the northeast Louisiana regional vision, goals, and performance measures as dealing with improving the safety on Louisiana state highways. It addresses four areas emphasis: alcohol, seatbelts, young drivers, and infrastructure and operations.

Progress from Prior TIP

The following are the significant projects from the prior edition of the Monroe Metropolitan Planning Organization Transportation Improvement Plan which have been let for construction or completed.

- H.002622 Arkansas Road/La. 616 Widening
- H.009932 US 80 Widening
- H.011742 Ole Highway 15 (Ark Rd. – US80)
- H.011740 Walnut (Overlay)
- H.011729 Natchitoches St. (Rehabilitation)
- H.011741 Hadley St. (Construction)
- H.011722 Glenwood Dr. (Rehabilitation)
- H.007288 Montgomery St. (Utility)
- H.011784 Stubbs Vinson Rd. (La. 139-US 80)
- H.011743 40 Oaks Farm Rd (Ark Rd – Standard Reed Rd)
- H.007288 Montgomery St. (La.34 – I20)
- H.011745 Sandal St. (La3033 – La 143)
- H.011725 Parker Rd (Moore – Garrett)
- H.011725 4th Street
- H.011747 Edwards rd. (La 3033 – Pine Ridge Rd)

Improvement Cost Estimates

The Monroe MPO, with assistance from Neel-Schaffer, Inc., uses historical data to estimate future costs for projects proposed in this document. The estimates were prepared in consultation with the Louisiana Department of Transportation and Development. The results are an average cost per improvement type as listed below. All numbers are listed in 2008 dollars and reflect projects constructed in Lake Charles, Lafayette, Baton Rouge, and Houma.

Improvement:	Average Cost:	Per:
New 4 Lane Freeway	\$15,500,000	Mile
New 2 Lane Roadway	\$2,250,000	Mile
New 4 Lane Arterial	\$4,250,000	Mile
Interstate Widening	\$8,000,000	Mile
Interstate Rehab	\$900,000	Mile
Arterial Widening	\$4,000,000	Mile
One Way Couplet	\$3,500,000	Mile
Center Turn Lane	\$1,750,000	Mile
Reconstruction	\$2,250,000	Mile
Overlay	\$400,000	Mile
ITS	\$450,000	Mile
Intersection Improvement	\$750,000	Each
New Interchange	\$22,000,000	Each
Underpass	\$12,000,000	Each
RR Overpass	\$5,800,000	Each

The averages are general guidelines to estimate future improvement costs. Further refinement to a project's estimated cost may be made through a detailed engineering study.

Glossary of Terms

Apportionment—Federal-aid funds appropriated to each state over a multi-year period as a result of an act of Congress. Current funding is authorized by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) which became law on August 10, 2005 (Public Law 109-59).

Average Daily Traffic (ADT): The average number of vehicles passing a given point on a roadway in a 24-hour day.

Clean Air Act Amendments of 1990 (CAAA): Legislation that identifies mobile sources as a major source of pollution and calls for stringent new requirements in metropolitan areas and states where attainment of the NAAQS is contested.

Environmental Assessment (EA): Class III action under the National Environmental Policy Act (NEPA) process. It is a concise public document that provides sufficient evidence for determining whether to prepare an Environmental Impact Statement (EIS) or to determine a Finding of No Significant Impact (FONSI).

Environmental Protection Agency (EPA): Federal agency created in the Environmental Protection Act of 1970 which is responsible for enforcing, monitoring, and maintaining Federal environmental laws.

Federal Aid Urbanized Area: An area which contains at least 50,000 people and has sufficient population density to be classified as urban by the Federal Highway Administration.

Federal Highway Administration (FHWA): An administrative division of the U.S. Department of Transportation responsible for roadway projects throughout the country.

Federal Transit Administration (FTA): Another branch of the U.S. Department of Transportation responsible for mass transportation projects throughout the country.

Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA): A major piece of Federal legislation that implements broad changes in the way transportation decisions are made. ISTEA emphasizes diversity and balance of modes and the preservation of existing systems. It imposes a series of environmental, social and energy factors that must be considered in planning, programming, and selection of projects. ISTEA increased the responsibility of the MPO.

Intelligent Transportation System (ITS): The development or application of technology to improve the efficiency and safety of surface transportation systems.

Louisiana Department of Environmental Quality (LDEQ): State of Louisiana Agency with jurisdiction over environmental regulation.

Louisiana Department of Transportation and Development (LADOTD): State of Louisiana agency with jurisdiction over transportation.

Level of Service: A measure of highway congestion ranging from free flow of traffic to forced flow on a scale of A to F.

Metropolitan Area: An area with a population of at least 50,000 as defined by the Bureau of Census.

Metropolitan Boundaries: The area represented by the existing urbanized area and the contiguous area forecasted to be urbanized in a 20 year horizon for the region. The area may include the entire Metropolitan Statistical Area (MSA) as designated by the Bureau of Census or another area as agreed upon by the governor and the MPO.

Metropolitan Planning Organization (MPO): An organization designated by the Governor under provisions of the 1973 Federal-Aid Highway Act and units of local government which represent 75% of the affected population to carry out the transportation planning process as required in Section 134 of Title 23 of the United States Code as amended by ISTEA and TEA 21. The MPO shares responsibility with the State for developing long and short range transportation plans and programs. The MPO provides a forum for discussion and consensus on issues which transcend jurisdictional boundaries.

National Ambient Air Quality Standards (NAAQS): Federal standards that set allowable concentrations and exposure limits for various pollutants. The standards are developed by the Environmental Protection Agency in response to the requirements of the Clean Air Act and subsequent amendments.

National Environmental Policy Act (1969) (NEPA): Requires environmental impact considerations to be included in project planning along with technical and economic concerns to ensure balanced decision-making occurs in the total public interest.

Nonattainment Area: A geographic region of the United States that has been designated as not complying with the NAAQS by the EPA.

Obligation Authority: Each year during the budget process, Congress sets limits on the amount of Federal Apportionment that can be expended for projects. Usually it is less than amounts apportioned. Obligation Authority covers most of the funding categories established by SAFETEA-LU.

Ozone (O₃): A secondary pollutant formed when hydrocarbons and oxides of nitrogen combine in sunlight. The ozone is associated with smog and haze conditions. Although the ozone in the upper atmosphere protects us from harmful ultraviolet sunlight, ground level ozone produces an unhealthy environment in which to live.

Right-of-Way—Land (ROW): usually in public ownership, through which a roadway passes, including the area for shoulders, sidewalks, and other cross section elements.

The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU): The most recent transportation act signed by the President on August 10, 2005. SAFETEA-LU provides guaranteed funding for highways, highway safety, and public transportation in the amount of \$244.1 billion.

State Implementation Plan (SIP): A plan showing how the State will meet air quality standards as required by 1977 Clean Air Act Amendments. Included are traffic control measures to reduce emissions from automobiles, a major contributor to carbon monoxide and photochemical oxidant pollution.

Statewide Transportation Improvement Program (STIP): A five year program of highway and transit projects for the state. It is a compilation of projects utilizing various federal and State funding programs, and includes highway projects on the state, city, and county highway systems, as well as projects in the national parks, national forests, and Indian reservations.

Transportation Equity Act for the 21st Century (TEA-21): The transportation act signed June, 1998. TEA-21 primarily continued the methods and procedures of transportation planning as established under ISTEA. TEA-21 enhanced and increased funding for many of ISTEA Federal-Aid funding programs.

Moving Ahead for Progress in the 21st Century (MAP-21) became law on July 6, 2012 (Public Law 112-141). It authorized highway, transit, and other surface transportation programs for federal fiscal years 2012 through 2014, MAP-21, while not significantly altering total funding, consolidates many of the programs started under the previous authorization acts: SAFETEA-LU, ISTEA, AND TEA-21.

Transportation Improvement Program (TIP): A eight year capital improvements program of highway and transit projects including operational and low cost projects to increase efficiency of the existing transportation network as well as capital intensive alternatives prescribed in the Long Range Transportation Plan.

Transportation Plan: A plan of recommended highway and transit facilities improvements to meet the immediate as well as the 20-year planning horizon to determine the transportation needs of the area. The Monroe Metropolitan Area Transportation Plan has both a Short and Long Range element.

United States Department of Transportation (USDOT): Includes FAA, FHWA, and FTA among others.

Vehicle Miles Traveled (VMT): Total motor vehicles miles traveled.

The Ouachita Council of Governments meeting was called to order by Mayor Jamie Mayo, Chairman. The meeting was held in the Council Chambers of the Monroe Government Plaza.

A motion was introduced and seconded to remove item #3 (Comments from ambulance providers) from the agenda. Motion failed due to the lack of a unanimous vote.

Minutes

A motion was made and seconded to approve the minutes of the June 25, 2018 meeting. Motion carried unanimously.

A motion was made and seconded to recess the OCOG meeting and go into Long Term Recovery Executive Board. Motion carried unanimously.

Long Term Recovery Executive Board

- A. **Report by Kevin Crosby** – Gave an update on progress by the Steering Committee and RSF'S meetings. Also, Mr. Crosby gave an update on the 7/17/2018 and 7/19/2018 Long Term Recovery Committee Public meetings that were held in Monroe and West Monroe.

No action was required for the Long Term Recovery Executive Board.

Comments from ambulance providers

- B. Acadian, AMR, and Pafford gave a brief report on the capabilities of their respective companies.

Ambulance Committee Report

- C. Jay Mitchell gave a report/update of the recommendation from the Ambulance Committee.
- D. A motion was made and seconded to introduce the Ambulance Committee recommendation that Acadian Ambulance Service be awarded the contract. Motion carried unanimously.

A motion was made and seconded to recess the OCOG meeting and go into Transportation Policy Committee. Motion carried unanimously.

Transportation Policy Committee

- A. Introduction of FY2018 – FY 2019 TRANSPORTATION IMPROVEMENT PLAN for the public review process.
- B. OCOG Budget to Actual 2018-2019 July report. A motion was made and seconded to accept the report. Motion carried unanimously.

A motion was made and seconded to ratify the action of the Transportation Policy Committee. Motion carried unanimously.

Adjourn
