

TRANSPORTATION IMPROVEMENT PROGRAM - FY 23-26

INTRODUCTION: JULY 25, 2022

ADOPTION: AUGUST 22, 2022

The Ouachita Council of Governments is committed to the principle of affirmative action and shall not discriminate against otherwise qualified persons on the basis of race, color, religion, national origin, sex, age, physical or mental handicap, or disability in its recruitment, employment, facility and program accessibility or services.

MPO RESOLUTION
POLICY COMMITTEE
ENDORSEMENT OF OCOG 2023-2026
TRANSPORTATION IMPROVEMENT PROGRAM

WHEREAS, the Ouachita Council of Governments (OCOG) Metropolitan Transportation Planning Organization Transportation Policy Committee (MPO) is responsible for carrying out a comprehensive, cooperative, and continuing transportation planning process throughout the Monroe Urbanized Area; and

WHEREAS, the Fixing America's Surface Transportation Act (FAST Act), passed by the United States Congress and signed into law by the President in 2015, requires that each MPO adopt a short-range work program that consists of federally funded and/or regionally significant transportation improvement projects within the metropolitan area; and

WHEREAS, various federal, state, regional, and local agencies and organizations concerned with transportation planning for the MPO area have cooperatively developed the Transportation Improvement Program (TIP) for Federal Fiscal Years 2023 through 2026 to satisfy federal planning requirements of the FAST Act; and

WHEREAS, the TIP is comprised of projects that are derived from the MPO's adopted Connecting Ouachita 2045 Metropolitan Transportation Plan, is consistent with local and state transportation plans, and has met the requirements of Title 23 Code of Federal Regulations Part 450.324; and

WHEREAS, the MPO has solicited the public and interested stakeholders in an open and transparent process as detailed by the MPO's Public Participation Plan which includes a public review and comment period of no less than 14 days and one formal public hearing;

NOW, THEREFORE, BE IT RESOLVED by the Transportation Policy Committee of the Monroe Area MPO, that the Transportation Improvement Program for Federal Fiscal Years 2023 through 2026 is adopted in order to ensure the continued livability, sustainability, prosperity, and diversity of Monroe Urbanized Area by implementing the Connecting Ouachita 2045 Metropolitan Transportation Plan.

CERTIFICATION

I hereby certify that the above is a true and correct copy of a Resolution adopted by the Monroe Urban Transportation Study Policy Committee at a meeting held on August 22, 2022.

Staci Mitchell, Chairman
Monroe Urban Transportation Study
Policy Committee

ATTEST:

Doug Mitchell
Executive Director

Joint Certification of the Metropolitan
Transportation Planning Process

The State of Louisiana and the Ouachita Council of Governments hereby certifies that the transportation planning process is addressing the major issues facing the Monroe urbanized area and is being conducted in accordance with all applicable requirements of:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964 as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST ACT (Pub.L.114-357 and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in US DOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the American with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27,37, and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101, prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities

MMPO Committees

The Monroe Metropolitan Planning Organization (MPO) is a consortium of governments responsible, in cooperation with the State, for the transportation planning process for the Monroe Urbanized Area. The MPO is comprised of two committees: The Policy Committee (PC), and the Technical Advisory Committee (TAC). The Policy Committee is the official decision-making body, and the TAC advises the Policy Committee on technical matters of projects, plans, and programs.

Policy Committee:

The Policy Committee serves as the official decision-making body for the MPO. The Policy Committee oversees how federal transportation dollars are spent in the transportation study area. The Policy Committee's responsibilities include the review and approval of all plans, programs, and projects. It is comprised of elected officials from region within the MPO's study area.

The Policy Committee is composed of six voting members and two non-voting members.

Voting Members:

- Mr. Friday Ellis, City of Monroe, Mayor
- Mrs. Staci Mitchell, MPO Vice Chair – City of West Monroe, Mayor
- Mr. Shane Smiley, Ouachita Parish Police Jury, Member
- Mr. Scott Robinson, MPO Policy Committee Chairman – City of Monroe, Ouachita Parish Police Jury, Member
- Mr. Thom Hamilton, City of West Monroe, Member
- Mr. Carday Marshall, City of Monroe, Council Member

Non-Voting Members:

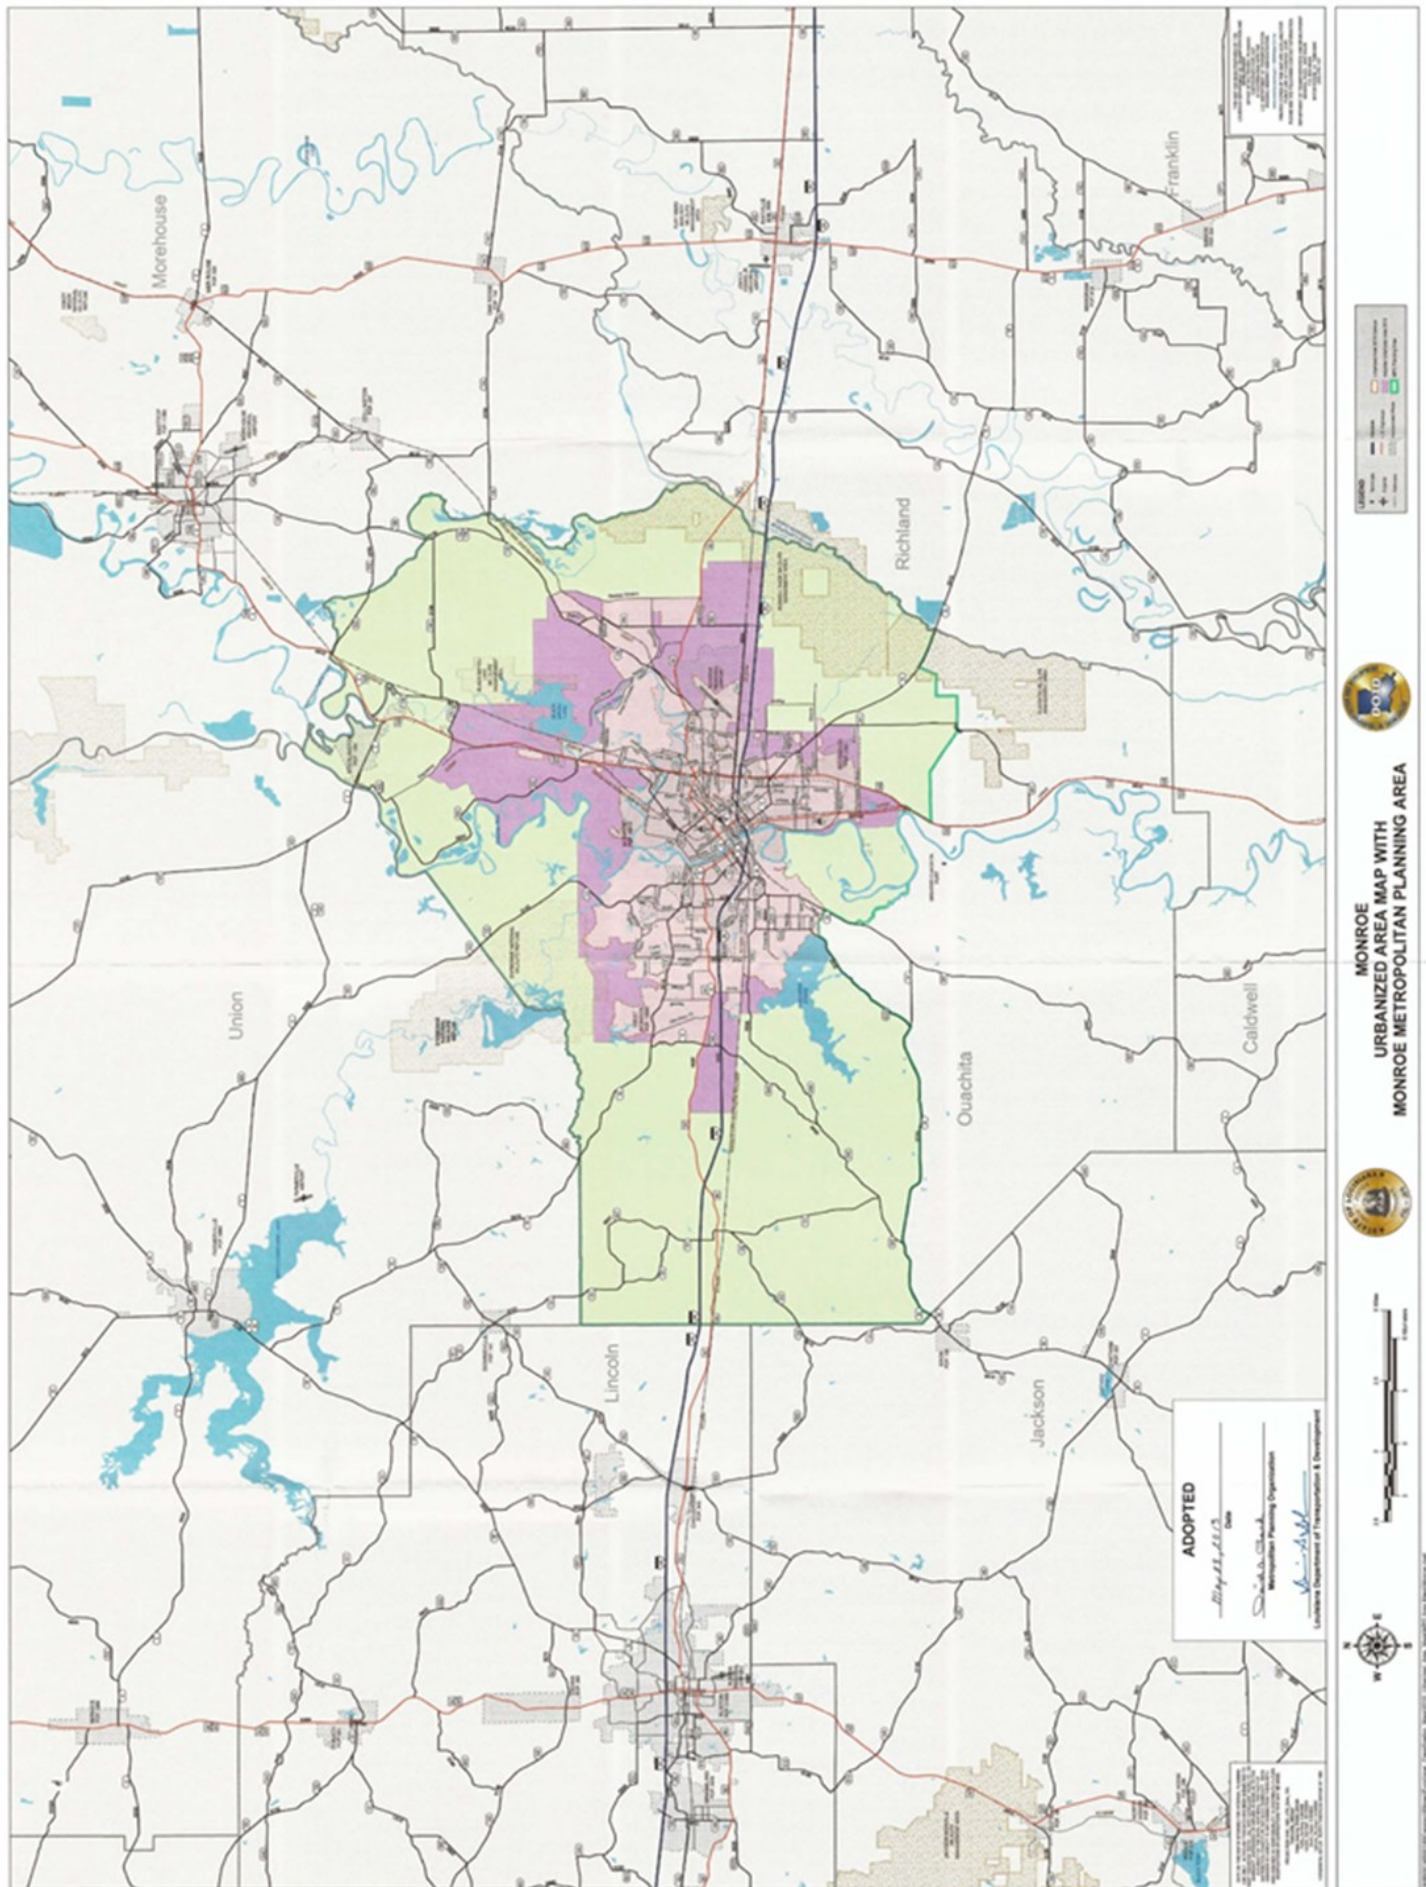

- Mr. Marshal Hill – LA Dept. and Transportation & Development, District 05 Administrator
- Mr. Carlos B. McCloud – Federal Highway Administration – Louisiana Division Office

Technical Advisory Committee:

The Technical Advisory Committee reviews plans, programs, projects, studies, and reports and provides the Policy Committee with recommendations concerning them. The TAC is represented by all agencies involved in the transportation planning process. Participants on the TAC include municipalities, parishes, the Louisiana Department of Transportation and Development, the Federal Highway and Transit Administration and other selected transportation interests.

Members:

- Mr. Kevin Crosby, Ouachita Parish Police Jury, Engineer
- Mr. John Tom Murry, Ouachita Parish Police Jury
- Mr. Morgan McCallister, City of Monroe, Engineer
- Mr. Arthur Holland, City of Monroe
- Mr. Marc Keenan, City of Monroe Transit
- Mr. Robbie George, City of West Monroe, Engineer
- Mr. Scott Olvey, City of West Monroe
- Mr. Matthew French, LADOTD
- Mrs. Dawn Sholmire, LADOTD
- Mrs. Angela Murrell, LADOTD
- Ms. Donna Lavigne, LADOTD – Public Transportation Administration
- Mr. Carlos B. McCloud, Federal Highway Administration

Introduction to Metropolitan Transportation Planning

Metropolitan Planning Organization (MPO)

MPOs, or Metropolitan Planning Organizations, are organizations designated by the federal government to be responsible for long-term urban transportation planning efforts. In other words, eligibility to spend federal money on transportation projects in certain local municipalities depends upon a functioning MPO. MPOs may be formed in areas with a population of at least 50,000 and meeting the minimum population density as defined by the Bureau of Census. They are created by an agreement between the Governor and local governments representing at least 75% of the population in an urban area. Typically, they are a consortium of governments and other bodies, such as transit agencies and citizen groups working together to carry out a cooperative, comprehensive, and continuous metropolitan transportation planning process.

The Transportation Planning Objective

The **Federal-Aid Highway Act of 1962** was the first piece of federal legislation to **mandate urban transportation planning** as a condition for receiving federal funds in metropolitan areas. The act stated:

“It is in the national interest to encourage and promote the development of transportation systems embracing various modes of transportation in a manner which will efficiently maximize mobility of people and goods within and throughout urbanized areas and minimize transportation related fuel consumption and air pollution.”

There are two significant features of the act. First, the act called for a planning process in urban areas rather than cities, setting the scale at the **regional level**. Second, the act called for the planning process to be conducted **cooperatively** with state and local communities.

Products of the Transportation Planning Process

The key role of the MPO is the creation of the **Metropolitan Transportation Plan (MTP)**, a long-range planning document, and the creation of the **Transportation Improvement Program (TIP)**, a project programming document.

The Monroe Metropolitan Transportation Plan (MTP)

The current Monroe Metropolitan Transportation Plan was adopted in October 2020. The purpose of that plan is to develop both long-range and short-range strategies that lead to the development of an integrated, intermodal transportation system. That system, in turn, facilitates the efficient movement of people and goods.

The principle result of the plan is a **prioritized list of improvements** divided into **three stages of implementation**. The first stage of projects forms the basis for the development of the Transportation Improvement Program.

The MTP must be multimodal, maintain a 20-year planning horizon, and be updated every five years. In addition, the plan must be fiscally constrained, including only those projects for which funding can be expected from reasonable estimated sources.

Factors considered in development of the current MTP are:

- Support Economic Vitality
- Increase Accessibility and Mobility
- Protect the Environment
- Enhance Modal Integration
- Promote Efficient System Management
- Preserve the Existing Transportation System
- Increase Safety
- Increase Transportation Security
- Purpose of the Transportation Improvement Program

The Transportation Improvement Program (TIP)

The Transportation Improvement Program (TIP) is a staged, multiyear program of projects proposed for funding by federal, state, and local sources within the Monroe Metropolitan Area. The TIP was developed by the Monroe Metropolitan Planning Organization in cooperation with Ouachita Parish Police Jury, the City of Monroe, the City of West Monroe and the Louisiana Department of Transportation and Development in accordance with the metropolitan planning requirements set forth in the federal highway spending bill, Public Law 114-94 - FAST Act (Fixing America's Surface Transportation Act). The TIP **identifies roadway and transit projects programmed for construction within the next four years** that implement the goals and objectives identified in the Monroe Metropolitan Area Transportation Plan.

Procedures to Amend or Administratively Modify the Transportation Improvement Programs

The following procedures are applicable for processing amend-ments or modifications to the TIP. In accordance with the provisions of *23 CFR 450.218(b)*, the Statewide Transportation Improvement Plan (STIP) shall be developed in cooperation with the MPO designated for a metropolitan area. Each TIP shall be included, without change, in the STIP, directly or by reference, after approval of the TIP by the MPO and the Governor. A metropolitan TIP in a nonattainment or maintenance area is subject to a FHWA/FTA conformity finding before inclusion in the STIP. In areas outside a metropolitan planning area but within an air quality nonattainment or maintenance area containing any part of a metropolitan area, projects must be included in the regional emissions analysis that supported the conformity determination of the associated metropolitan TIP before they are added to the STIP.

In accordance with **23 CFR 450.218(n)**, projects in any of the first four years of the STIP may be moved to any other of the first four years of the STIP subject to the project selection requirements of **23 CFR 450.222**. Such modifications do not require formal approval, provided expedited project selection procedures have been adopted in accordance with **23 CFR 450.222** and the required interagency consultation or coordination is accomplished and documented.

While every effort has been made to develop this document using the latest information available at the time, it is recognized that there are uncertainties in the development of projects, right-of-way acquisition, relocation of utilities, acquisition of permits, costs, funding availability, etc. Therefore, the Policy Committee has no objection to phases of projects moving within the TIP or STIP as necessitated by the situation and gives its approval to the MPO staff to make those necessary administrative modifications without action by the Policy Committee. Staff has been directed to keep Policy Committee members informed of upcoming administrative modifications.

An **Administrative Modification** is a minor revision to a long-range statewide or metropolitan transportation plan, TIP, or STIP that includes minor changes to the project, project phase costs, minor changes to funding sources of previously-included projects, and minor changes to project/project phase initiation dates. An administrative modification is a revision that does not require public review and comment, demonstration of fiscal constraint, or conformity determination (in nonattainment and maintenance areas).

Administrative Modification thresholds include:

1. Revisions to a project description without changing the project scope or which do not conflict with the pertinent environmental document.
2. Minor changes to the cost of a project phase (Feasibility, Environmental, R/W, Utility Relocation, Engineering, Construction):
 - Funding changes are limited to **\$1,250,000** for projects phases equal to and less than **\$5,000,000**.
 - **For project phases > \$5,000,000 an administrative modification is limited to budget changes of less than 25% in funding**
3. Minor changes in funding sources of previously included projects phases that do not effect fiscal constraint of the STIP or the ability to complete the project as initially described.
4. Minor changes to the project scope, project phase initiation dates as long as the project stays within the approved TIP time frame and does not affect fiscal constraint or the ability to complete the project as initially described. **23 CFR 450.218(n)**
5. A change in the project implementing agency
6. A split or a combination of individually listed projects; as long as cost, schedule, and scope remain unchanged.
7. The addition or deletion of projects from grouped project (line item) listings as long as the line item total funding amounts stay within the above guidelines.

Administrative modifications can be processed in accordance with these procedures provided that:

1. It does not affect the air quality conformity determination, including timely implementation of Transportation Control Measures (TCMs), and
2. It does not impact financial constraint of the STIP or the ability to complete the project as described.

Each MPO approved administrative modification needs to be published online separately from TIP amendments. The MPO should summarize this as an information item to the MPO Committee members each month. The MPO Board may delegate approval of administrative modifications to the MPO's Executive Director. If the MPO Board delegates approval of administrative modifications to the Executive Director, the MPO will need to provide copies of the delegation to the LADOTD, FHWA, and FTA. Any administrative modifications will be forwarded to the LADOTD Transportation Planning Section and Public Transportation Section for approval on behalf of the Governor.

If a project affected by an administrative modification is located within the planning boundaries of a MPO, the MPO must first generate and/or accept the administrative modification for its TIP. Once approved by the MPO, then LADOTD, on behalf of the Governor, can incorporate the administrative modification into Louisiana's STIP. The LADOTD will immediately notify the MPO, FHWA, and FTA of any approved administrative modification(s). The LADOTD can incorporate a STIP administrative modification before it is approved by the MPO as long as the TIP administrative modification process has started and if waiting for the TIP administrative modification documentation will delay the letting.

For projects in a rural area, once approved by the LADOTD, on behalf of the Governor, the administrative modification will be incorporated into Louisiana's STIP. The LADOTD will immediately notify the MPO, FHWA, and FTA of any approved administrative modification(s).

An **Amendment** is a revision to a long-range statewide or metropolitan plan, TIP, or STIP that involves a major change to a project, including the addition or deletion of a project or a major change in project cost, project or project phase initiation dates, or a major change in design concept or design scope. Changes to projects that are included only for informational purposes do not require an amendment. An amendment is a revision that requires public review and comment, demonstration of fiscal constraint, and/or a conformity determination (in nonattainment and maintenance areas).

If a project affected by an amendment is located within the planning boundaries of the MPO, it must first be amended in the TIP before it can be amended in the STIP. Once approved by LA DOTD, on behalf of the Governor, the amendment will be incorporated into the STIP, LA DOTD will immediately notify the MPO, FHWA, and FTA of any approved amendment(s).

TIP Objectives

The TIP for the Monroe Metropolitan Area was developed with the following local objectives:

- To identify transportation improvement projects as a result of a comprehensive, cooperative, and continuing regional transportation planning process.
- To identify the priorities by the Monroe Metro-politan Planning Organization, local governments and public transportation providers for transportation improvements.
- To use realistic, current estimates of costs for transportation improvement projects, balanced by reasonable estimates of

available revenues.

- To demonstrate that energy, air quality, cost and mobility considerations are addressed in regional transportation planning and programming of projects.
- To develop the TIP consistent with the Monroe Metropolitan Area Transportation Plan in accordance with guidelines established in the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users.

TIP Requirements

While federal legislation dictates that the Transportation Improvement Program must cover at least four years. The TIP may be updated annually but must be updated at least every four years.

The TIP must be financially reasonable or “constrained,” with estimates of the total cost for programmed projects balanced against the revenues reasonably expected during the TIP period. The TIP includes both federally and non-federally funded projects. Inclusion of a project in the TIP is a condition for federal funding but does not guarantee it. Non-federally funded projects are included in the TIP for informational purposes in order to provide a more comprehensive picture of how the transportation capital and operating funds are spent in the region.

The TIP must be approved by the MPO and the Governor. Once approved, the TIP becomes, without modification, part of the Statewide Transportation Improvement Program (STIP).

The Programming of Federal-Aid

Unlike most federal programs, highway funding does not depend upon the annual appropriations act for the authority to commit federal funds to a program or project. Such funding is traditionally authorized in a multi-year transportation authorization act, which establishes a maximum level of federal transportation funding per fiscal year. However, the establishment of this level of funding, which is referred to as an authorization, is only the first step in the process.

Once the authorization level has been established, the United States Department of Transportation annually allocates such funding among states based upon various federal formulas. This allocation is referred to as an apportionment. This amount, or an estimate thereof, is the basis for the development of transportation improvement programs and MPO financial plans. This is not the end of the process, however, because the annual apportionment rarely represents the actual amount of federal funds which can be committed by a state.

Typically, an amount less than the apportionment is actually available, due to the imposition of obligation authority. Obligation authority constitutes a federally imposed limitation on the spending of apportioned funds in a given fiscal year. This limitation may be imposed in a multi-year authorization act, in the annual Appropriations Act, or in both, in which case the most recent enactment controls. Obligation authority is typically less than a state's apportionment; nevertheless, as mentioned earlier, because of scheduling requirements, a state's apportionment is the basis for the development of TIPs.

There are two important distinctions between apportionment and obligation authority. First, apportionment is allocated on a per-program basis, while obligation authority is generally allocated as a lump sum. Also, unused apportionment carries forward into successive fiscal years, but unused obligation authority does not. Unused apportionment that is carried forward is referred to as an unobligated balance. Although a state's unobligated balance can be used to increase the federal-aid programmed within a particular funding category in a given year, it cannot be used to increase the total amount of a state's highway apportionment.

Federal regulations require states to "provide MPO's with estimates of Federal and State funds which the MPOs shall utilize in developing financial plans."

FAST Act Programs

Fixing America's Surface Transportation Act (FAST Act) became law on December 4, 2015 (Public Law 114-94). It authorized highway, transit, and other surface transportation programs for federal fiscal years 2016 through 2020. FAST Act, while not significantly altering total funding, consolidates many of the programs started under the previous authorization acts: SAFETEA-LU, ISTEA, TEA-21, and MAP-21. For the purpose of this document, the core programs are:

The Congestion Mitigation and Air Quality Improvement Program (CMAQ)

CMAQ is a funding source for use in meeting the requirements of the Clean Air Act. Eligible activities include transit improvements, transportation demand management, and conversion of public fleets to cleaner fuels. CMAQ funding is available for use in areas that do not meet the National Ambient Air Quality Standards (nonattainment areas) and in former nonattainment areas that are currently in compliance (maintenance areas). Funds are distributed to states based upon a formula that considers population and severity of pollution. A State may transfer up to 50% of its increase in CMAQ funds to other federal transportation programs; however, such funds must still be used in nonattainment and maintenance areas.

The Monroe MPO area is currently designated as an attainment area and is not eligible for CMAQ funds.

The Surface Transportation Program (STP)

The Surface Transportation Program (STP) provides flexible funding that may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge and tunnel projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects, including intercity bus terminals.

Highway Safety Improvement Program (HSIP)

Authorizes Federal-aid funding to achieve significant reduction in traffic fatalities and serious injuries on all public roads or publicly owned bicycle and pedestrian pathways or trails. States are required to have a Strategic Highway Safety Plan (SHSP) and certify that it has met its railway-highway crossing and infrastructure safety needs.

Transportation Alternative Program (TAP)

FAST Act establishes a new program to provide for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. The FAST ACT continues the funding from MAP-21 programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and several other discretionary programs, wrapping them into a single funding source.

Public Transportation

Similar to the highway program, FAST Act maintains the nation's commitment to the primary public transportation programs established in previous transportation acts. The principle programs are:

Section 5339 Bus and Bus Facilities

Provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.

Section 5309 Fixed-Guideway Capital Investment Grants

Provides grants for new and expanded rail, bus, rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors. This program defines a new category of eligible projects, known as core capacity projects, which expand capacity by at least 10% in existing fixed-guideway transit corridors that are already at or above capacity today, or are expected to be at or above capacity within five years. The program also includes provisions for streamlining aspects of the New Starts process to increase efficiency and reduce the time required to meet critical milestones.

Section 5309 Flexible Funding Programs

The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS. This was a new program under MAP-21.

The STP provides funding that may be used by States and localities for a wide range of projects to preserve and improve the conditions and performance of surface transportation, including highway, transit, intercity bus, bicycle, and pedestrian projects.

The TAP program consolidates funding from FHWA's

former Transportation Enhancements, Recreational Trails, and Safe Routes to School programs.

Section 5310 Enhanced Mobility of Seniors & Individuals with Disabilities

This program is intended to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

FAST Act Planning Requirements

FAST Act preserves most aspects of the previous legislation. However, changes to the MPO planning process are required. These changes must be reflected in the Metropolitan Transportation Plan (MTP) and Transportation Improvement Plan (TIP).

Relevant Documents

Monroe Metropolitan Area Transportation Plan

LADOTD Project Number: H.972037

The project is a major revision to the master transportation plan for the Monroe Urbanized Area. The study assesses the current state of the area's transportation system, estimates future needs and resources, and provides a detailed program for preserving and expanding the system for a 25-year period.

The project includes a computer model (Travel Demand Model) to simulate traffic conditions for the current transportation system and test potential projects to determine a project's future effect (volume) upon the system.

The travel demand model will incorporate demographic information from the U.S. Census. The study was adopted by the Monroe MPO Policy committee October 2020. The study was conducted by Neel-Schaffer.

Louisiana Statewide Transportation Plan

The Louisiana Department of Transportation completed a major revision to the State's long range master plan for all transportation modes. The study analyzed the State's infrastructure and the document provides a vast amount of statistics to describe the use and condition of the various modes. The plan presents recommended improvements based upon several revenue scenarios. The update began in mid-2000 and a final report was completed December 2003.

Northeast Louisiana Regional Transportation Safety Plan

Prepared by Cambridge Systematic, Inc. for the Louisiana Department of Transportation and Development. The document will outline the northeast Louisiana regional vision, goals, and performance measures as dealing with improving the safety on Louisiana state highways. It addresses four areas emphasis: alcohol, seatbelts, young drivers, and infrastructure and operations

Progress from Prior TIP

The following are the significant projects from the prior edition of the Monroe Metropolitan Planning Organization Transportation Improvement Plan which have been let for construction or completed.

- H.013394 Mane Street Phase I (Rehabilitation)
- H.013395 Parkwood Drive (Rehabilitation)
- H.013776 Well Road (New Natchitoches Rd. - I-20)
- H.013791 Hadley Street (US Hwy 165 - Nutland Rd.)
- H.013798 Harrell Road (US 80 - Arkansas Rd.)
- H.013796 Tanglewood Drive (La. 15 - Dellwood Dr.)
- H.013802 Garrett Road (La. 15 - Austin St.)
- H.011739 US 165 South Lighting
- H.013400 Natchitoches Street (Rehabilitation)
- H.013518 Otis Street (Rehabilitation)
- H.013803 Richwood Road No.2 (US 165 - Brown St.)
- H.014397 Rowland Road (LA 139 - LA 594)
- H.013804 Wall Williams Road (Good Hope Rd - Whites Ferry Rd.)
- H.013805 Finks Hide-A-Way (Barkley - Bayou Oaks)

The Financial Plan

The implementation of this plan will involve several funding sources. These sources include various programs at the local, State, and Federal levels. On the Federal level, these programs are under the Moving Ahead for Progress in the 21st Century Act (MAP-21), currently the FAST ACT include the:

NATIONAL HIGHWAY PERFORMANCE

PROGRAM (NHPP) - covers all interstate routes and a large percentage of urban principal arterials. The funding match under the NHPP for arterial routes is Federal (80)/Local (20), with the exception of the Interstate which has a funding match of Federal (90)/Local (10). This category of funds can also be used to replace or repair any bridge on a public road and has a funding match of Federal (80)/Local (20).

SURFACE TRANSPORTATION PROGRAM (STP)

- a block grant funding program with subcategories for States and Urban Areas. With the exception of local roads and rural minor collectors, these funds can be used for any roads including the NHS. The funding can be up to 100%.

HIGHWAY SAFETY IMPROVEMENT PROGRAM

(HSIP) - covers safety improvements to all public roads, but is constrained in that improvements in safety metrics are required to be eligible; however, funding can be up to a 100% federal share.

TRANSPORTATION ALTERNATIVES (TA)

- covers improvements such as pedestrian and bicycle facilities, landscaping, historic preservation, recreational trails, infrastructure safety improvements within 2 miles of schools (K-8), and more. Based on the type of improvements, the federal share of funding can be up to 100%.

Any costs not covered by Federal and State will be the responsibility of the local public agency. Local funds can come from a variety of sources including property taxes, sales taxes, user fees, special assessments, impact fees and bond issues.

The current Monroe Urbanized Area 2045 Metropolitan Transportation Plan was adopted in October, 2020. This document can be found at northdelta.org.

Surface Transportation Program (STP) funding for seven urbanized areas with a population less than 200,000 is approximately \$17,500,000 per year. The Monroe Metropolitan Area's STP share is approximately \$3,500,000 per year (including matching funds). All STP projects listed on the Monroe Metropolitan Area's TIP were based on funds allocated for this area. All non-STP (NHPP, HSIP, and TAP) projects that appear within this document were developed jointly by the MPO and in consultation with the LADOTD through their financially constrained STIP.

The four-year FY 2023-2026 TIP was developed within the financial limits of all funding sources as presented by the MPO and LADOTD. As priorities and needs change in the Monroe Metropolitan Area, this plan may be revised to respond to those changes.

IMPROVEMENT COST ESTIMATES

Improvement:	Average Cost:	Per:
New 4 Lane Freeway	\$15,500,000	Mile
New 2 Lane Roadway	\$2,250,000	Mile
New 4 Lane Arterial	\$4,250,000	Mile
Interstate Widening	\$8,000,000	Mile
Interstate Rehab	\$900,000	Mile
Arterial Widening	\$4,000,000	Mile
One Way Couplet	\$3,500,000	Mile
Center Turn Lane	\$1,750,000	Mile
Reconstruction	\$2,250,000	Mile
Overlay	\$400,000	Mile
ITS	\$450,000	Mile
Intersection Improvement	\$750,000	Each
New Interchange	\$22,000,000	Each
Underpass	\$12,000,000	Each
RR Overpass	\$5,800,000	Each

The averages are general guidelines to estimate future improvement costs. Further refinement to a project's estimated cost may be made through a detailed engineering study.

Glossary of Terms

Apportionment: Federal-aid funds appropriated to each state over a multi-year period as a result of an act of Congress. Current funding is authorized by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) which became law on August 10, 2005 (Public Law 109-59).

Average Daily Traffic (ADT): The average number of vehicles passing a given point on a roadway in a 24-hour day.

Clean Air Act Amendments of 1990 (CAAA): Legislation that identifies mobile sources as a major source of pollution and calls for stringent new requirements in metropolitan areas and states where attainment of the NAAQS is contested.

Environmental Assessment (EA): Class III action under the National Environmental Policy Act (NEPA) process. It is a concise public document that provides sufficient evidence for determining whether to prepare an Environmental Impact Statement (EIS) or to determine a Finding of No Significant Impact (FONSI).

Environmental Protection Agency (EPA): Federal agency created in the Environmental Protection Act of 1970 which is responsible for enforcing, monitoring, and maintaining Federal environmental laws.

Federal Aid Urbanized Area: An area which contains at least 50,000 people and has sufficient population density to be classified as urban by the Federal Highway Administration.

Federal Highway Administration (FHWA): An administrative division of the U.S. Department of Transportation responsible for roadway projects throughout the country.

Federal Transit Administration (FTA): Another branch of the U.S. Department of Transportation responsible for mass transportation projects throughout the country.

Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA): A major piece of Federal legislation that implements broad changes in the way transportation decisions are made. ISTEA emphasizes diversity and balance of modes and the preservation of existing systems. It imposes a series of environmental, social and energy factors that must be considered in planning, programming, and selection of projects. ISTEA increased the responsibility of the MPO.

Intelligent Transportation System (ITS): The development or application of technology to improve the efficiency and safety of surface transportation systems.

Louisiana Department of Environmental Quality (LDEQ): State of Louisiana Agency with jurisdiction over environmental regulation.

Louisiana Department of Transportation and Development (LADOTD): State of Louisiana agency with jurisdiction over transportation.

Level of Service: A measure of highway congestion ranging from free flow of traffic to forced flow on a scale of A to F.

Metropolitan Area: An area with a population of at least 50,000 as defined by the Bureau of Census.

Metropolitan Boundaries: The area represented by the existing urbanized area and the contiguous area forecasted to be urbanized in a 20 year horizon for the region. The area may include the entire Metropolitan Statistical Area (MSA) as designated by the Bureau of Census or another area as agreed upon by the governor and the MPO.

Metropolitan Planning Organization (MPO): An organization designated by the Governor under provisions of the 1973 Federal-Aid Highway Act and units of local government which represent 75% of the affected population to carry out the transportation planning process as required in Section 134 of Title 23 of the United States Code as amended by ISTEA and TEA 21. The MPO shares responsibility with the State for developing long and short range transportation plans and programs. The MPO provides a forum for discussion and consensus on issues which transcend jurisdictional boundaries.

National Ambient Air Quality Standards (NAAQS): Federal standards that set allowable concentrations and exposure limits for various pollutants. The standards are developed by the Environmental Protection Agency in response to the requirements of the Clean Air Act and subsequent amendments.

National Environmental Policy Act (1969) (NEPA): Requires environmental impact considerations to be included in project planning along with technical and economic concerns to ensure balanced decision-making occurs in the total public interest.

Nonattainment Area: A geographic region of the United States that has been designated as not complying with the NAAQS by the EPA.

Obligation Authority: Each year during the budget process, Congress sets limits on the amount of Federal Apportionment that can be expended for projects. Usually it is less than amounts apportioned. Obligation Authority covers most of the funding categories established by SAFETEA-LU.

Ozone (O3): A secondary pollutant formed when hydrocarbons and oxides of nitrogen combine in sunlight. The ozone is associated with smog and haze conditions. Although the ozone in the upper atmosphere protects us from harmful ultraviolet sunlight, ground level ozone produces and unhealthy environment in which to live.

Right-of-Way—Land (ROW): usually in public ownership, through which a roadway passes, including the area for shoulders, sidewalks, and other cross section elements.

The Safe, Accountable, Flexible, Efficient

Transportation Equity Act: A Legacy for Users (SAFETEA-LU): The most recent transportation act signed by the President on August 10, 2005. SAFETEA-LU provides guaranteed funding for highways, highway safety, and public transportation in the amount of \$244.1 billion.

State Implementation Plan (SIP): A plan showing how the State will meet air quality standards as required by 1977 Clean Air Act Amendments. Included are traffic control measures to reduce emissions from automobiles, a major contributor to carbon monoxide and photochemical oxidant pollution.

Statewide Transportation Improvement Program (STIP): A four-year program of highway and transit projects for the state. It is a compilation of projects utilizing various federal and State funding programs, and includes highway projects on the state, city, and county highway systems, as well as projects in the national parks, national forests, and Indian reservations.

Transportation Equity Act for the 21st Century (TEA-21): The transportation act signed June, 1998. TEA-21 primarily continued the methods and procedures of transportation planning as established under ISTEA. TEA-21 enhanced and increased funding for many of ISTEA Federal-Aid funding programs.

Moving Ahead for Progress in the 21st Century (MAP-21) became law on July 6, 2012 (Public Law 112-141). It authorized highway, transit, and other surface transportation programs for federal fiscal years 2012 through 2014, MAP-21, while not significantly altering total funding, consolidates many of the programs started under the previous authorization acts: SAFETEA-LU, ISTEA, AND TEA-21.

Transportation Improvement Program (TIP): A four-year capital improvements program of highway and transit projects including operational and low cost projects to increase efficiency of the existing transportation network as well as capital intensive alternatives prescribed in the Long Range Transportation Plan.

Transportation Plan: A plan of recommended highway and transit facilities improvements to meet the immediate as well as the 20-year planning horizon to determine the transportation needs of the area. The Monroe Metropolitan Area Transportation Plan has both a Short and Long Range element.

United States Department of Transportation (USDOT): Includes FAA, FHWA, and FTA among others.

Vehicle Miles Traveled (VMT): Total motor vehicles miles traveled.

TIP PROJECT SELECTION CRITERIA

The staff at the Monroe MPO issues a Call for Projects before the start of each Federal Fiscal Year (FFY). The Technical Advisory Committee (TAC) discusses at length all projects received within the auspices of the project selection criteria. Moreover, staff advises TAC to ensure selected projects adhere to anticipated performance targets. TAC advises staff to forward the selected projects to the Transportation Policy Committee (TPC). Finally, TPC deliberates on the TAC selected projects and provides final direction to the Monroe MPO staff pending public comments. Staff issues a public notice using print media to avail public comments for a period of 14 days, providing complete TIP document for public review at all locations identified within the Public Participation Plan. If no public comments are received, the TPC Chair signs a resolution adopting the TIP.

*****To see a further explanation on the TIP project selection criteria, how projects are scored and prioritized, and a timeline, please see pages 90-92.**

PERFORMANCE MEASURES

With the passage of the Federal surface transportation legislation, “Moving Ahead for Progress in the 21st Century” (MAPO-21), performance-based planning (PBP) has taken forefront with even greater significance. FAST Act (2015) further emphasized ensuring performance-based planning continues with mandates to both statewide and metropolitan planning processes to incorporate a more comprehensive performance-based approach to their decision-making. The legislation requires the USDOT, in consultation with States, MPOs and other stakeholders, to establish performance measures in the following areas:

- a) Safety
- b) Infrastructure Condition
- c) Congestion Reduction
- d) System Reliability
- e) Freight Movement and Economic Vitality
- f) Environmental Sustainability
- g) Reduced Project Delivery Delays

The TIP is a critical component of the Performance-Based Planning process because it commits transportation funding to specific improvement projects and operational strategies. Through this process, MPOs link planning to programming by prioritizing projects and allocating requisite funding for projects within the TIP ensuring consistency with the goals established in the Metropolitan Transportation Plan (MTP).

Using a performance-based approach to transportation planning helps the region understand its current needs and allows planners and decision-makers to track progress over time. As required by federal legislation, the Metropolitan Planning Organization (MPO) adopted performance targets for several federally required transportation performance measures and is monitoring performance for these measures over time.

TPM included in the Connecting Ouachita 2045 MTP which was adopted October 26, 2020.

TRANSPORTATION PERFORMANCE MANAGEMENT IMPLEMENTATION MEASURES AND TARGETS FOR MONROE URBANIZED AREA

Monroe/LaDOTD Performance Measure 2 and Targets			
Pavement Condition			
Performance Measure	Baseline Performance (2018)	2-Year Target (2020)	4-Year Target (2022)
% of pavements of the Interstate System in Good condition	9%	N/A*	> 10%
% of pavements of the Interstate System in Poor condition	2%	N/A*	< 4%
% of pavements of the non-Interstate NHS in Good condition	29%	> 16%	> 14%
% of pavements of the non-Interstate NHS in Poor condition	10%	< 10%	< 12%
Bridge Condition			
Performance Measure	Baseline Performance (2018)	2-Year Target (2020)	4-Year Target (2022)
% of NHS bridges classified as in Good Condition	16%	> 35%	> 30%
% of NHS bridges classified as in Poor Condition	0%	< 9.9%	< 9.9%

*The FAST Act states that for the first performance period only, the state baseline condition and 2-year targets are not required for the Pavements on the Interstate System measures.

Monroe/LaDOTD Performance Measure 3 and Targets			
System Performance			
Interstate Travel Time Reliability Measures	Baseline Performance (2018)	2-Year Target (2020)	4-Year Target (2022)
% of person-miles traveled on the Interstate that are reliable	100%	88.9%	88.4%
Interstate Travel Time Reliability Measures	Baseline Performance (2018)	2-Year Target (2020)	4-Year Target (2022)
% of person-miles traveled on the non-Interstate NHS that are reliable	88.50%	N/A**	86.60%
Freight Measure			
Freight Reliability Measure	Baseline Performance (2018)	2-Year Target (2020)	4-Year Target (2022)
Truck Travel Time Reliability (TTTR) Index	1.14	1.37	1.4

**The FAST Act states that for the first performance period only, the state baseline condition and 2-year targets are not required for the Pavements on the Non-Interstate NHS measures

MONROE MPO HIGHWAY SAFETY PERFORMANCE MEASURES AND TARGETS

Monroe MPO Highway Safety Performance Measures and Targets (2014-2018 Trends and Results)		
Performance Measure	5-Year MPO Average (Base Value)	Targeted Annual Change
Number of Fatalities	21.6	-1%
Number of Serious Injuries	24.4	-1%
Rate of Fatalities per 100 million VMT	1.379	-1%
Rate of Serious Injuries per 100 million VMT	1.561	-1%
Number of Non-motorized fatalities and serious injuries	15	-1%

TRANSIT ASSET MANAGEMENT PLAN PERFORMANCE MEASURES AND TARGETS FOR MONROE TRANSIT SYSTEM

Monroe MPO Highway Safety Performance Measures and Targets (2018 Trends and Results)		
Asset Category	Performance Measure	2019 Target
Rolling Stock: All Revenue Vehicles	Age - % of revenue vehicles within a particular asset class that have met or exceeded Useful Life Benchmark (ULB)	Bus - 0% Cutaway - 0%
Equipment: Non-revenue vehicles	Age - % of vehicles within a particular asset class that have met or exceeded Useful Life Benchmark (ULB)	Service Vehicles - TBD
Facilities: All buildings or structures	Condition - % of facilities with a condition rating below 3.0 on the FTA Transit Economic Requirements Model (TERM)	Facilities - 0%

FINANCIAL SUMMARY

For a project to be included in the TIP, per federal regulations, reasonable fiscal constraint must be maintained. Fiscal constraint is achieved by keeping estimated transportation improvements within reasonably anticipated budgets. MONROE MPO affirms that its FFY 2023 – 2026 TIP meets all fiscal constraint requirements.

MONROE

The Monroe Urbanized Area – MPO's Project Selection Process consists of five (5) steps:

1. Project Call
2. Project Submission
3. Project Review and Evaluation
4. Technical Advisory Committee Approval and Recommendation
5. Transportation Policy Committee Review and Approval

The following pages contain a detailed discussion of the five (5) steps and how they are carried out.

Step 1. Project Call

Each January, the MPO Director, in consultation with the Technical Advisory Committee, will send out a call for projects notice to all member governments in the Monroe Urbanized Area. The project call will run for approximately 90 days, through the end of March. All projects must be submitted prior to the ending date specified in the project call letter.

Projects submitted during this call will be reviewed for their impact on the current conformity determination. If the project does not affect the current conformity determination, then it will be eligible for evaluation.

Step 2. Project Submission

The Monroe Urbanized Area 'MPO Initiated Project, Stage 0 Preliminary Scope and Budget Checklist' and 'Stage 0 Environmental Checklist' (found in Appendix A) should be used to submit candidate projects to the MPO Director. It is advisable that engineering assistance is utilized to develop all cost estimates.

In addition to the Checklists provided in Appendix A, the Sponsoring Agency should Updated Form 2012 DOTD submit a resolution with commitment of local matching funds.

Step 3. Project Review and Evaluation

Those projects complying with the requirements listed earlier in this document will be prioritized and potentially selected for funding by a working group of the TAC. The TAC working group will include representatives from eligible Sponsor Agencies. MPO staff will coordinate and conduct TAC work group meetings and provide technical guidance. The work group will evaluate the projects based on the following criteria:

1. ***Improve Safety and Security (0 – 10 Points).*** Safety is defined as protection against unintentional harm and relates to both motorized and non-motorized modes of travel; and Security is defined as protection against intentional harm and relates to both motorized and non-motorized modes of travel. While Safety and Security are considered as two separate and distinct factors in transportation planning, they are considered as a single factor in this document. **Examples** of improved safety and security could be: reduction in the number of automobile crashes, reduction of the risk of individual acts of criminal behavior on a transit line, improvement in the emergency response capacity after an act of terrorism, etc.

2. ***Protect the Environment (0 – 10 Points).*** Methods for protecting the environment are as unique as the local environments that they serve. Therefore, **examples** of ways in which a transportation system can impact the environment are myriad. In the Monroe Urbanized Area, the most important environmental protection issues are wetlands protection and flood protection. Examples of ways to protect the environment are: not building roads in environmentally sensitive areas; or building projects that reduce idling time by big trucks.

3. ***Reduce Congestion (0 – 15 Points).*** Congestion is defined as a roadway system operating at speeds below that for which it was designed. **Examples** of ways in which congestion could be reduced are: the addition of turning lanes; or improvements to signalization.

4. ***Support Land Use and Economic Development Goals (0 – 15 Points).*** Land Use and Economic Development Goals are inexorably connected, and can be impacted by many factors, one of which is the transportation system. Therefore, the transportation investment decisions must consider the state and local economic and land use goals. **Examples** of ways in which the Land Use and Economic Development Goals of the community could be met: not building new roads into areas prone to flooding; or, providing lanes for non-motorized travel; and providing pedestrian amenities along a business corridor; or improving the efficiency of freight movement to and from a port.

5. ***Increase Connections (0 – 10 Points).*** The connectivity of the streets network and circulation system is measured through the ease by which people and goods can move to their desired destinations. Connectivity relates not only to the ease of movement of people and goods within the community, but also to external destinations – regional, national and international. Examples of ways in which connections could be increased are: adding bridges across water barriers; or adding bike and pedestrian paths from neighborhoods to schools that do not necessitate crossing a major arterial.

6. ***Improve Access (0 – 10 Points).*** Improving access involves control and management of the entrance and exit points to a transportation facility for people and freight. Increasing the number of access points does not necessarily improve access. Improved access is based on a balance between the number of access points and the efficient movement of traffic through the transportation facility. Examples of ways in which access could be improved are: a reduction in the number of driveways that enter a

major arterial; or, development of a hierarchical master street plan that designs roads based on use.

7. *Increase Multi-Modal Options and Energy Conservation (0 –15 Points).* The various modes of travel within the community function best when people and goods can easily move from one mode of travel to another. Energy conservation has become a national priority in recent years. The transportation sector uses the largest portion of energy consumed in the US. Therefore, increase in multi-modal options and connectivity between them will lead to conservation of energy. **Examples** of ways this could be achieved includes: a reduction in the use of single occupancy vehicles; expansion of the fixed route transit system into previously unserved areas; an increase in the number of streets with sidewalks; and an increase in intermodal freight transfer facilities.

8. *Improve Quality of Life (0 – 10 Points).* The quality of life of a community is a term that the community must define for itself. The transportation system can have both positive and negative impacts on the quality of life in a community. **Examples** of ways that a transportation system could have a positive impact on the quality of life are: a reduction in mobility gaps experienced by low-income communities; or, a reduction in the time that families spend commuting to school and work. Examples of ways that the transportation system can have a negative impact on the quality of life in a community are: addition of access points to a neighborhood that encourages through traffic that endangers children at play; or widening of roadways to improve port access that also encourages truck traffic carrying hazardous materials through residential neighborhoods.

9. *Cost Sharing (0-5 Points).* The (STP Urban Mobility/Rehabilitation) funding category requires a mandatory 20% local match. If the project has more than 30% local match, it will be awarded 5 points.

10. *Project Readiness (No Points).* This criterion determines the year in which a project or phase of a project will be programmed in the TIP. It is recommended that this criterion should be used to assess the project timeliness only and not for the project prioritization process. The following factors determines the project readiness:

- Design Delays
- Right of Way (ROW) Acquisition
- Environmental Problems
- Funding Unavailability

Step 4. Technical Advisory Committee Prioritization and Recommendation

After reviewing the work group recommendations the TAC will choose to forward a recommendation to the TPC for review and approval.

Step 5. Transportation Policy Committee Review and Approval

The Monroe Urbanized Area TPC will review the TAC recommendations. If the Transportation Policy Committee chooses to reject the recommendation of the Technical Advisory Committee, the project listing is sent back to the TAC work group for further review and evaluation. If the Technical Advisory Committee's recommendations are adopted, the prioritized list will be included in the MTP and TIP where funding allows.

The Ouachita Council of Governments meeting was called to order by Mayor Mitchell. The meeting was held in the Council Chambers of the Monroe Government Plaza.

A roll call certified a quorum was present.

A motion was made by Shane Smiley and seconded by Thom Hamilton to approve the May 23, 2022, minutes. Motion carried unanimously.

A motion was made by Thom Hamilton and seconded by Carday Marshall to recess OCOG and enter into the Transportation Policy Committee. Motion carried unanimously.

Transportation Policy Committee

A motion was made by Shane Smiley and seconded by Carday Marshall to approve the TIP Amendments listed below for adoption. Motion carried unanimously.

- **H.007289 KANSAS LN EXT (OLD STERL.-US165) PHASE 1**
Add Construction phase at \$9.11M in STCASH in FFY 2022.
**Note: the fund source will be converted to STPFLEX at 80/20 with STBONDS as match in FFY 2023.
- **H.011724 COLEMAN AVE REHAB PHASE 1**
Remove Construction phase at \$268k in STP<200k at 80/20 from the current TIP in FFY 2022 since it's on the new TIP in FFY 2026.
- **H.013398 COLEMAN AVE REHAB PHASE 2**
Remove Construction phase at \$315,014 in STP<200k at 80/20 from the current TIP in FFY 2022 since it's on the new TIP in FFY 2027.

A motion was made by Shane Smiley and seconded by Carday Marshall to approve the project bid increases for **H.014347 S. Grand St.; Orange St.-Standifer Ave.** and **H.014348 Lee Ave.; Jackson St.-Standifer Ave.** by using funds from FFY 2023 to make up the difference. Motion was also made to move **H.014689**

A public hearing was held August 22, 2022, at the Council Chambers of the Monroe Government Plaza at 11:30 a.m. to hear comments from the public regarding the FFY 23-26 TIP introduced at the previous July 25, 2022, OCOG meeting. There were no comments.

The Ouachita Council of Governments meeting was called to order by Staci Mitchell. The meeting was held in the Council Chambers of the Monroe Government Plaza.

A roll call certified a quorum was present.

A motion was made by Thom Hamilton and seconded by Friday Ellis to approve the July 25, 2022, minutes. Motion carried unanimously.

A motion was made by Friday Ellis and seconded by Thom Hamilton to recess OCOG and enter into the Transportation Policy Committee. Motion carried unanimously.

Transportation Policy Committee

A motion was made by Thom Hamilton and seconded by Friday Ellis to approve the FFY 23-26 TIP for adoption. Motion carried unanimously.

Kirk Cellien of Neel-Schaffer Engineering updated OCOG on the Safe Streets and Roads for All (SS4A) discretionary grant program. OCOG agreed to move forward and apply for the grant through North Delta Regional Planning and Development District.

A motion was made by Thom Hamilton and seconded by Friday Ellis to adjourn the Transportation Policy Committee and reconvene OCOG. Motion carried unanimously.

A motion was made by Friday Ellis and seconded by Thom Hamilton to ratify the actions of the Transportation Policy Committee. Motion carried unanimously.
